

MULTIPLE INSTALLATION LOCATION INSTRUCTIONS

Always measure to be sure the bases are properly spaced. A minimum of 5 feet is recommended between each station when using the commercial base. A minimum of 3 feet is needed from the side of the pool to the first station (see fig 5). A minimum of 15 feet travel out distance is needed when swimming head to head. (NOTE: To determine distance from pool edge, see Figs. 5a, b, and c.)
